Welcome to the SoftNet Laboratory Wiki

Dear Guest,
Welcome to the Wiki of the Software Technology and Network Applications Laboratory (SoftNet).

The Software Technology and Network Applications Laboratory is a unit of the Electronic and Computer Engineering Department of the Technical University of Crete located in Chania, Crete. The laboratory is a centre of research and teaching software systems’ technology and network applications. The research and teaching activities of the laboratory include operating and distributed systems, sensor networks, continuous data streams, large and distributed databases, and topics in algorithms and complexity.

The SoftNet laboratory has also developed and offers consulting services for several open-source software packages for research and teaching.

Sincerely,
Minos Garofalakis
Professor,
Director of SoftNet
